

Remarks

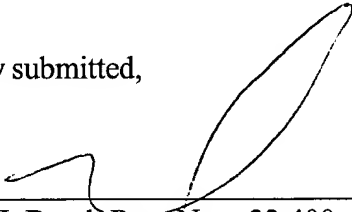

Reexamination and reconsideration of the application as amended are respectfully requested.

Applicants wish to thank the Examiner for his detailed and thorough consideration of the application in view of the prior art. With respect to the amended claims, claim 1 has been amended to include the subject matter of dependent claim 4 which was indicated as containing allowable subject matter, specifically, in that the applied reference did not disclose the specific features recited in this claim. With respect to claim 22, the 35 USC §112 objection has been addressed. Further, claim 22 has been amended to indicate that both the support frame and the hold down frame include wall portions spaced apart from their media engaging elements with the engaging elements of both being angled away from their respective wall portions. This feature is neither taught nor suggested in the references of record and is directed specifically toward features such as shown in Fig. 12 of the application as originally filed.

In view of the above, it is submitted that the application is in condition for allowance and such is respectfully requested.

Respectfully submitted,
